

Krishna Vats

Computer Science Student: Full-Stack Developer (Java / Spring Boot): AI/ML Enthusiast
Delhi, India | +91 9045061946 | krishna.22b1531171@abes.ac.in | Github | LinkedIn | Leetcode

Education

ABES Engineering College, Ghaziabad, UP

July 2026

Bachelor of Engineering (CSE - AIML)

- Computer Science undergraduate with hands-on experience building 2 full-stack applications using **Java**, **Spring Boot**, and **Node.js**; strong foundation in data structures, object-oriented programming, and **REST API design**, backed by a track record of shipping complete projects end-to-end.

Projects

SchemeSeva: Government Scheme Recommendation Portal

Smart India Hackathon (SIH), Nov 2025

Java, Spring Boot 3.2, React 18, MongoDB, JWT : Github 

- Built a full-stack government-scheme recommendation platform end-to-end (**Spring Boot** backend + **React** frontend) covering **15+ welfare schemes**, helping citizens discover schemes they qualify for.
- Designed a rule-based eligibility/recommendation engine in **Java** evaluating **20+ eligibility criteria** and implemented secure **JWT**-based authentication, resolving a Spring **circular dependency** using `@Lazy` initialization.
- Modeled **8+ MongoDB collections** and refactored multi-class DTOs into single-responsibility files, diagnosing and fixing backend startup failures to stabilize the service.

Real-Time Object Tracking System (YOLOv4 + Deep SORT)

May 2025

Python, TensorFlow : Github 

- Built a computer vision pipeline combining **YOLOv4** for object detection and **Deep SORT** for multi-object tracking, achieving **85% tracking accuracy**.
- Optimized the inference pipeline with **TensorRT**, delivering **2x faster inference** and enabling real-time processing at **30 FPS** on NVIDIA GPUs.
- Designed the pipeline to track **10+ objects** simultaneously across video frames in real time, supporting robust multi-object analytics.

Technical Skills

- **Languages:** Java, Python, JavaScript (ES6+), TypeScript, C
- **Backend:** Spring Boot, REST APIs, JWT Authentication, Node.js, Flask
- **Frontend:** Next.js, React, HTML5, CSS3, Tailwind
- **AI/ML:** NLP (spaCy), Computer Vision (OpenCV, YOLO), TensorFlow
- **Databases & Tools:** MongoDB, Git, Docker, VS Code

Certifications

- Infosys Springboard: Programming in **C** (2022)
- Infosys Springboard: **HTML5 & CSS** (2023)
- Great Learning: Frontend Development (2024)
- Simplilearn: Introduction to Generative AI Studio (July 2025)
- Solved **250+ DSA problems** on LeetCode and other coding platforms

Leadership & Achievements

Java Programming Intern, CodSoft

Oct 2025 – Dec 2025

- Developed **Java** solutions in a virtual internship setting; led **3+ project modules**, maintained technical documentation, and collaborated remotely with mentors to deliver production-quality code.

Java Programming Intern, CodeAlpha

Aug 202 – Oct 2025

- Developed **Java**-based applications and implemented OOP concepts; contributed code across **10+ code reviews**, debugging, and feature development.

Student Council Member

- Organized tech events attended by **200+ participants**, achieving **95% satisfaction**.

Cultural Club President

- Led a **team of 15** to execute talent shows for **300+ attendees**.
